

Improve Picture Quality with Home Theater Power Conditioners by Panamax

MAX_® 5400-EX THE SOURCE OF PURE SOUND AND PICTURE™

TOP BENEFITS

Improves Picture and Sound Quality

MANAX. M5400-EX

LEVEL 5 Power Cleaning and Filtration eliminates common symptoms of contaminated power (including loss of detail, pops, hisses, hums and visual artifacts) and allows your A/V equipment to perform up to its full capability.

2 Monitors Incoming Line Voltage and Provides a Visual Indication of Power Level

Panamax's patent pending AVM[™] circuitry continuously monitors the incoming power and amperage draw of connected equipment as displayed on the digital meters. A red lightning bolt below the voltmeter will flash to indicate an under or over voltage condition. Power to the connected equipment is automatically turned off if either of these conditions is detected. When voltage returns to a safe level, power to the equipment is automatically reconnected.

3 Reduces Cross-Contamination Between Components

The M5400-EX is designed to provide noise isolation between 5 isolated outlet banks including 2 high current outlets so that any noise created by an A/V component cannot contaminate the power going to equipment plugged into the other outlet banks.

FEATURES

- LEVEL 5 Power Cleaning and Filtration
- Protect or Disconnect[™] Automatic Voltage Monitoring Circuitry (AVM[™])
- Digital Voltmeter (incoming voltage) and Ammeter (total current draw) and Power Status Indicator Lights
- 11 Outlets: 4 Always On,
 4 Switched, 2 High Current,
 1 Convenience (front)

- 5 Isolated Outlet Banks
- Coaxial Signal Line Protection: 2 HD Sat and 2 HD CATV
- Auto-resetting Telephone (payper-view) and LAN Line Protection
- DC Trigger input and output
- Rack Mounting Brackets Included
- Optional Silver Bezel

MAX[®] 5400-EX REAR PANEL FEATURES

Main Circuit Breaker Automatically opens when the current load is greater than 15 Amps.

Outlet Banks 3 & 4

Two switched outlets per bank. ON/OFF status is controlled by the front panel Power Button or the DC Trigger input. They will turn on immediately and turn off after 10 seconds. EMI/RFI noise filtration is provided by the four stage balanced Pi filter. Banks 3 and 4 are noise isolated from each other as well as all other outlet banks.

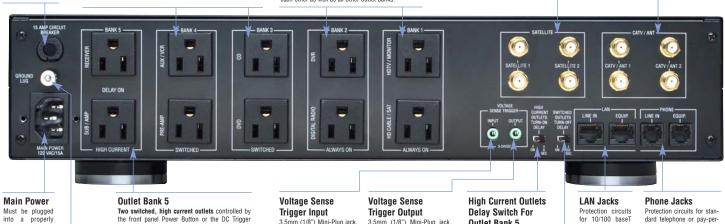

Outlet Banks 1 & 2

Two always on outlets per bank. Power will only be turned off under a fault condition. (See specifications for over-voltage and under-voltage thresholds) Power for each bank is cleaned by a four-stage balanced Pi filter. Banks 1 and 2 are noise isolated from each other as well as all other outlet banks

Satellite TV Coax Jacks

Bidirectional protection circuit optimized for satellite TV signal lines.

Cable TV Coax Jacks Bidirectional protection circuit optimized for cable TV. off-air antennas and cable modem signal lines.

Must be plugged into a properly wired & grounded 3-wire outlet

Ground Lug

ground leads.

Two switched, high current outlets controlled by the front panel Power Button or the DC Trigger input. Bank 5 has a 5 second turn on delay and turns off immediately. The High Current outlets provide power from a low impedance noise filtra-tion circuit that does not limit the current to your equipment. Its output is noise isolated from all of Provides a common grounding point for equipment with separate the other outlet banks.

3.5mm (1/8") Mini-Plug jack. Connect to a remote trigger device that uses a DC output to trigger a startup/shutdown sequence. This bypasses the front panel power switch. 3.5mm (1/8") Mini-Plug jack. Connecting a trigger wire to the Voltage Sense Output jack will allow the input signal to pass through the MAX® 5400-EX to control the startup/shutdown of an additional device

Outlet Bank 5 Allows the outlet bank to be set as "Always ON" or with a 5 second turn-on delay auto-resetting.

Protection circuits for stan-dard telephone or pay-per-view lines. Phone circuit is

Switched Outlets Delay Switch For Outlet Banks 3 & 4 Allows the outlet banks to be set as "Always ON" or with a 10 second turn-off delay

Ethernet lines.

MAX® 5400-EX SPECIFICATIONS

AC Power	
Line Voltage:	
Total Current Capacity:	
UL1449 Suppression Rating:	330\
Protection Modes:	L-N, L-G, N-G
Initial Clamping Level:	
Energy Dissipation:	
Peak Impulse Current:	73,000 Amps
Catastrophic Surge Circuit:	Yes
Thermal Fusing:	
Over-voltage shutoff:	142 VAC ±5 VAC
Under-voltage shutoff:	
EMI/RFI Noise Filtration	
Banks 1 - 4:	100 db, 100 KHz – 2 MHz
Bank 5, High Current Outlets:	60 db, 100 KHz – 2 MHz
Common Mode (all banks)	60 db, 100 KHz - 2 MHz
DC Trigger Input	
Jacks:	
Voltage and Polarity:	
Current Requirement:	
DC Trigger Output	
Voltage:	<15\
Current:	
Short-circuit protection:	
Delay on output:	

LAN Circuit	
Clamping Level:	8V ± 2V
Jacks:	
Wires Protected:	
Televiser Oliverit	
Telephone Circuit	
Fuseless/Auto-resetting:	Yes
Clamping Level:	
Capacitance:	30pf (approx.)
Suppression Modes:	
Jacks:	RJ-11
Wires Protected:	2-Wire, Pins 4 & 5
Satellite TV Circuit	
Bidirectional:	Yes
Shielded:	Yes
Clamping Level:	
Attenuation:	< 1db from 950MHz-2.05GHz
	< 2.4db @ 2.2GHz
Connections:	Female "F", Gold Plated
Cable TV Circuit	
Bidirectional:	Yes
Shielded:	
Clamping Level:	
Attenuation:	
Connections:
